

**Interactive** charts let you explore and present data in stages, to emphasize relationships between values or groups of data. Drag the slider to see different data sets.

Interactive charts can be used to show data like sales by group over time, expenses by department, and population changes by country per continent.

Time by Sort Type				
DESCRIPTION	USER	SYSTEM	TOTAL	REAL
Heap Sort	0.000000	0.000000	0.000000	0.000430
Quick Sort	0.000000	0.000000	0.000000	0.000206
Bucket Sort	0.000000	0.000000	0.000000	0.000102
